

DEAR

Thank you for welcoming us into your skincare routine!

We're so happy to meet you.

We are a new Korean Beauty brand based in Seoul.

Subi means "defence" in Korean and that's exactly what Subi products are - a defence for your skin.

To help you get the most out of your Perfect Pimple Patches, we've put together a cheat sheet with our top tips for using our patches. We hope these will help you to get rid of pimples safely ASAP.

Our patches are 100% vegan, cruelty-free, alcohol-free, fragrance free, silicone-free, paraben-free and fungal acne safe.

We can't wait for you to try us!

Love Subi xo

TEAR TO PATCH

To remove a patch from the plastic backing sheet, simply tear down the perforated line. This will help you to easily remove your patches without them sticking to anything.

WASH UP FIRST

Before applying a patch, wash and dry the area and apply a patch to clean skin. Do not apply skincare over the patched area or the patch may not stick properly onto your skin.

KNOW YOUR PIMPLE

Our hydrocolloid patches work best on whiteheads (surface pimples). Do not apply patches on deeper cysts, nodules, or infected acne.

YOUR PATCH HAS WORKED WHEN:

1. The patch turns white

This means the liquid from your pimple has been fully absorbed. You can remove and discard the patch. Apply another if necessary.

2. The patch loses its stickiness

This means the patch is ready to be removed safely without interrupting your skin's healing. This may occur after 24 hours but can be longer. If pus remains in your pimple, please apply another patch.

CAUTION

Bleeding is not a normal reaction when using our patches. If bleeding occurs, please discontinue use immediately.

Please seek the approval of your treating physician if you are currently or have previously been prescribed medication for the treatment of acne. Our patches are not designed to replace medical advice or treatments.
